

Technical Intelligence Terms

Adequacy of Transportation	Ocean Port Facilities
Air Lift Capability	Open Inland Waterways
Air Transportation load factor	Pole Line
Amplitude Modulation	Printer
Automatic Morse	Printer Circuit
Bandwidth	Quaded Cable
Breakdown of Transport Service	Radar
Broadcasting	Radiobroadcasting
Cable	Radiofixation
Carrier Telephony	Recoverability
Carrier Telegraphy	Regional Broadcasting
Channel	Relay Yard
Circuit	Repeater Station
Classification Yard	Restricted Inland Waterways
Coaxial Cable	Scatter
Continuous Wave	Shoran
Double side-band	Sky Wave
Facsimile	Submarine Cable
Frequency Modulation	Super High Frequency
Frequency Shift Keying	Teleprinter
Ground Wave	Teletypewriter
High Frequency	Terminal Yard
Inland Waterway Port Facilities	Transport Inputs
Lines of Communications	Transport labor productivity
Link	Transportation Capabilities
Local Broadcasting	Transportation Capacities
Locomotive Repair Facilities	Transportation Economics
Locomotive Service and Repair Facilities	Transportation Equipment Utilization
Long Range	Transportation Performance
Loran	Trunk
Low Frequency	Trunk Line
Main Line	Turnaround Time
Medium Frequency	Ultra High Frequency
Microwave Broad-Band	Very High Frequency
Microwave Narrow-Band	Very Low Frequency
Morse	Wire Diffusion
Network	Wireline
